

UNIPAS®

DMC1- IBC Container 1000L

UNIPAS

Our foldable IBC solution for dry materials

Benefits and Features:

This foldable container has a foldable half of the back for easy access. A large bottom discharge hole allows easy and efficient discharge of granulated materials, while a solid four-way entry pallet base enables the best handling and durability.

The hinged split lid ensures that one person is enough to operate the container. Our UNIPAS DMC1 1000L IBC container is compatible with tipping equipment for top decanting as well as for easy discharging through a bottom discharging hole. Thanks to its simple and solid construction, the UNIPAS DMC1 1000L IBC container offers considerable savings in the transport and storage of dry material compared to many types of disposable packaging.

Applications of the container include: cereals, frozen fruits and vegetables, granulates, powders, meat products and other food, pharmaceutical or chemical raw materials.

Product Specifications:

Application: Dry, granulated and loose materials

Dimensions:

External dimension with lid:
L 1160 x W 1160 x H 1219 mm

Capacity and weight:

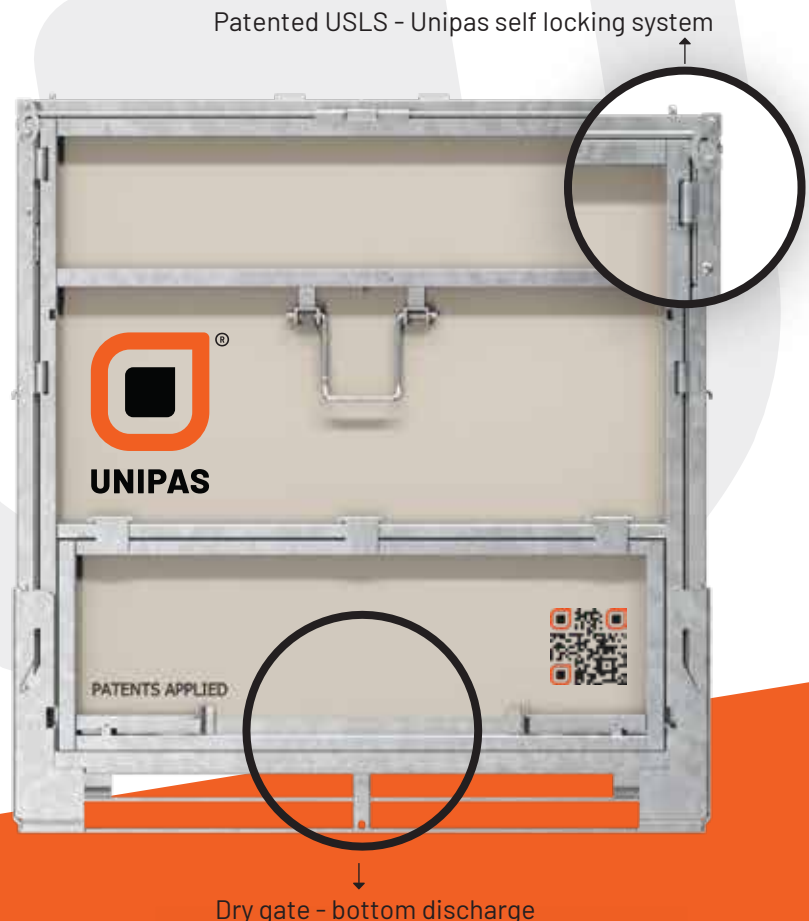

Load capacity: 1 400 kg
Load volume: 1220 litres
Empty weight: 144 kg

Working Temperature: -25 to +60 °C **Folding ratio:**

1:3

Max stacking: 5 full loaded units up **Materials:**

galvanized steel, polypropylene
