

CHILDREN'S CAROUSEL LUCKY

Technical specification

DIAMETER	2470 mm
HEIGHT	950 mm
WEIGHT	370 kg
MAX LOAD	450 kg
SAFE ZONE	Ø 900 cm

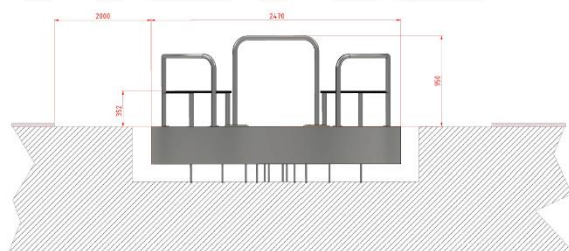

Material identification:

- structural steel, aluminum teardrop sheet, stainless steel, wooden plywood
- surface treatment - hot-dip galvanizing, anti-slip treatment of plywood
- high quality bearing mechanism with taper bearing

Installation:

The carousel structure is inserted into a pre-built reinforced concrete bed with drainage and a gravel-sand base, then it is massively anchored.

The device is **certified** by the **Technical Inspection** of the Slovak Republic and meets the safety requirements of playground equipment verified by test in the scope of **EN 1176**.
